4. FIRST AID MEASURES

In all cases of doubt, or when symptoms persist, seek medical attention.

Inhalation: Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. If symptoms develop and persist, get medical attention.

Skin contact: Wash with soap and water. If symptoms develop and persist, seek medical attention.

Eye contact: Immediately flush with plenty of water for at least 15 minutes. If irritation persists, seek medical attention.

Ingestion: Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention.

Symptoms: See section 11.

5. FIRE FIGHTING MEASURES

Extinguishing media: Water spray (fog), foam, dry chemical or carbon dioxide.

Special firefighting procedures: Water spray may be ineffective. Oil will float on water and can spread fire. Do not allow runoff and contaminants from fire fighting to enter drains or water course.

Unusual fire or explosion hazard: Combustible – US & Canada. VAPOR MAY CAUSE FLASH FIRE. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flashback. Closed container may explode when exposed to extreme heat.

Hazardous combustion products: Oxides of carbon.

6. ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected personnel.

Environmental precautions: Contain spilled material. Remove any ignition source. Prevent further leakage or spillage if safe to do so. Do not allow product to enter sewer or waterways.

Clean-up method: Contaminated surfaces will be extremely slippery. Contain & absorb spillage with non-combustible material e.g sand, earth, vermiculite. Place in closed containers outside building and dispose of in accordance with local waste regulation. Clean residue with soap & water.

Do not allow spills to enter drains or water courses. If drains become contaminated, inform local water officials immediately. In the case of contamination into streams or waterways, also inform the EPA.

Dispose of in accordance with all federal, state and local environmental regulations.

7. HANDLING AND STORAGE

Handling: Avoid skin and eye contact. Keep container closed. Use with adequate ventilation. Wash hands thoroughly with soap & water after handling.

Storage: Store in a dry, well ventilated area. Store at room temperature and out of direct sunlight. Store empty containers as if they were full.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls: Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit values.

Skin protection: Wear chemical resistant gloves. Gloves should be inspected before each use and discarded if they become worn.

Eye/Face Protection: Wear safety goggles to prevent material from entering eyes.

Respiratory Protection: Use NIOSH/OSHA approved respirator where there is the potential to exceed the exposure limits.
