

Zinc Anti-Seize Thread Compound

Commercial Grade

Prevents seizing and galling during assembly and disassembly of aluminum and aluminum alloy parts, engaged with components of similar or dissimilar metals.

PREVENTS SEIZING AND GALLING
PROTECTS AGAINST CORROSION

DESCRIPTION

Armite's ZP-770 is an anti-seize compound formulated from zinc powder, specialty oils, and grease for use on aluminum fasteners. ZP-770 is especially effective when fasteners are associated with iron components.

ZP-770 helps reduce repair times when applied at every service interval. It is an excellent anti-seize in harsh environments.
